### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicant claims an electroluminescent device comprising a 2H-benzotriazole compound with the general structures I, II, IV, V, and VI as defined in claims 1-4, 7 and 9-10. The closest prior art, Sano et al., U.S. Patent Number 5,779,937 teaches an organic electroluminescent device comprising a benzotriazole compound with the structure

. The benzotriazole compound of the Sano reference has a hydroxyl group that is used to coordinate with a chelate ligand structure to be used in the electroluminescent device. The present claims do not require a hydroxyl group as a substituent on the attached phenylene. The substituents required in the present claims would not coordinate with the chelating material in the Sano reference and removing the OH group from Sano et al. would destroy the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
